

CALL FOR PAPERS

Abstract Deadline: April 1, 2016

Notification of Acceptance: May 15, 2016

The Program Committee has scheduled both oral and poster sessions. The abstract of both oral and poster papers are published in the same manner in the conference materials. On the electronic submission form, authors will be asked for their presentation format preference. Submitted abstracts must report new information and not previously published or presented at a national or international scientific meeting, unless there is a substantial update of data.

We encourage submissions from international, and undergraduate and graduate students pursuing a degree in a science, technology, engineering, and math (STEM) at an accredited college or university. International and student participants will receive a reduced conference fee.

Proposals for special sessions, such as panels and invited oral presentations are also welcome. Please indicate your request in the comments field of the abstract form.

The abstract should clearly describe key innovations, new research, and developments related to space domain awareness. For a complete list of categories, visit the Speakers page of the conference website.

Abstract Format and Submission

Papers will be selected on the basis of the submitted abstract. The abstract should clearly outline the paper's major elements of interest, its originality, and be non-marketing in scope. Papers not selected for oral presentation may be selected for display as poster papers. Abstracts will be published in the 2016 AMOS Conference abstract booklet. If your abstract requires public release approval, ensure to complete prior to August 15. The papers will be published in the 2016 AMOS Conference proceedings.

- Abstract (300 words in length)
- Identify the principal author and co-authors
- Include a short biography of the presenting author
- Designate one author to receive all correspondence
- Suggested session(s)

Submit an Abstract online at www.amostech.com

SPONSOR AND EXHIBIT

Showcase your organization at the AMOS Conference by becoming a sponsor. With three days of interactive discussions and networking opportunities, sponsorship increases your organization's presence at the conference and can be tailored to suit your interests. Exhibit space is available for public and private sector organizations to display products and services involving new technologies. Space is limited, so please reserve your space early.
