#AMOS2018

CONFERENCE DESCRIPTION

The Advanced Maui Optical and Space Surveillance Technologies (AMOS) Conference is the premier technical conference in the nation devoted to space surveillance. The cross section of military, contractor, and academic participation fuels important dialogue and collaboration on a national and international scale. The continued growth in attendance and participating countries reflects a growing interest in Space Situational Awareness as new actors—national governments, start-up companies, universities, and non-governmental entities—become more involved in space activities.
