DEVELOPMENT BOARD

JOIN US!

The Advanced Maui Optical and Space Surveillance Technologies (AMOS) Conference is consistently recognized as the preeminent scientific conference in the field of space situational/domain awareness (SSA/SDA). The conference is attended by nearly 1,000 scientists, engineers and space experts from around the globe.

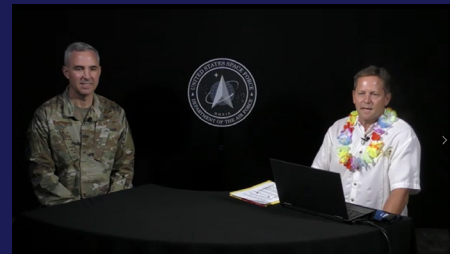

FEATURING

- // Senior Level Keynote Speakers
- // SSA/SDA Policy Forums
- // Oral and Poster Presentations
- // Conference Awards
- // Journal Publication Opportunity
- // Technical Short Courses
- // Interactive Exhibits
- // Networking Events
- // EMER-GEN® Professional Development Program
- // Student Exploration Day

The four-day event features technical short courses and more than 100 presentations in the fields of telescope optics, adaptive imaging, satellite tracking and astrodynamics. The conference also features high-level presentations and panel discussions by key stakeholders in space policy.

Recognizing that conference plans may need to adapt due to the continuing COVID-19 pandemic, AMOS is proceeding as an in-person event and potential virtual components will be announced at a later date. Visit amostech.com for the latest updates.

May 14

Notification of Short Course
Acceptance
June 1

Student Award Technical
Paper and Co-Author
Statement Deadline*
June 25

Last Day to Update Abstract,
Presenter Registration, Photo
and Bio Deadline
August 13

Technical Paper & Copyright
Agreement Deadline
August 31

Presentation Files Deadline**
August 31

**Students wishing to apply for the student
award must submit their completed
manuscript and co-author statement by
June 25, 2021.*

***Subject to change pending final
conference format*

2021 AMOS CALL FOR PAPERS

The Program Committee has scheduled both oral and poster sessions, and abstracts of all papers are published in the same manner in the conference materials. On the electronic submission form, authors will be asked for their presentation format preference. Submitted abstracts must report new information and not previously published or presented at a national or international scientific meeting, unless there is a substantial update of data. Abstracts that appear to be marketing in scope will automatically be recommended for exhibition. Relevant topics and themes as well as further details can be viewed at <https://amostech.com/amos-speakers>.

Recognizing that conference plans may need to adapt due to the continuing COVID-19 pandemic, authors are asked at the time of submission to indicate their willingness to participate in a potential virtual format. The answers provided are for planning purposes only and will not affect the technical review of the submissions.

SUBMISSION DETAILS: WWW.AMOSTECH.COM/AMOS-SPEAKERS

JOURNAL PUBLICATION

The AMOS Conference, in conjunction with the American Astronautical Society, is delighted to provide participating authors the opportunity to be published in a special AMOS Conference issue of the Journal of Astronautical Sciences. Invitations to be peer-reviewed and considered for publication will be extended upon conclusion of the Conference. Learn more about this opportunity at <https://amostech.com/journal-publication/>.

CONFERENCE AWARDS

In collaboration with the Space Surveillance Technical Committee of the American Astronautical Society (AAS), the AMOS Conference recognizes outstanding efforts in the field of Space Situational Awareness by presenting a series of awards at the close of the annual conference. Award criteria and details are available online at <https://amostech.com/awards/>.

ATTENTION STUDENTS!

The AMOS Conference Student Award provides travel assistance and conference registration. Students wishing to apply for this award must submit their completed manuscript and co-author statement by June 25, 2021. Late submissions will not be considered for the award.

CALL FOR SHORT COURSE PROPOSALS

Proposals are being solicited for half-day Short Courses. The short courses are intended to offer opportunities for participants to acquire an introductory knowledge on conference topics. Focus topics of broad interest from excellent instructors are encouraged. Short courses are solicited from all technical areas within SSA subject areas.
